Technology Resources

CommonWealth Academy provides a challenging technology curriculum as a powerful tool for students to achieve life skills. Students use technology both independently and cooperatively to access new and exciting information sources, inspire a zest for life-long learning and produce documents applicable to the real world.

Our technology model supports the classroom curriculum and uses tools to link students to a world of resources,. Students enjoy exciting and enriching life experiences.

Current Technology Resources Include:

A desktop or laptop computer for every staff member including instructors

A networked computer lab with 25 computers

Listening Centers with headphone sets in every classroom

Televisions with VCR's and DVD players

Overhead projectors

Interactive White Boards

Document Cameras / Digital Cameras

Student Response Remote Control Systems

iPads

Notebooks
